

Environmental Management System Statement

Christiani & Nielsen (Thai) PCL will implement an Environmental Management System that draws on the intentions and principles of ISO 14001 : 1996 environmental Management Systems. This Statement identifies the objectives, commitment and responsibilities on all the Company's employees to control the environmental impact whilst in the execution of their duties.

To ensure the implementation of this statement at all levels in the Company, Christiani & Nielsen (Thai) PCL shall appoint personnel who will have responsibility, along with their other duties, for the continuing development and maintenance of the system.

These guidelines are for all employees to :-

- a) make every effort to conserve the use of material and energy and, where viable collect waste materials for recycling.
- b) wherever viable, use material and products from sustainable sources that are also re-usable or recyclable.
- c) identify that whilst construction is in progress, all reasonable precautions will be taken against environmental damage, disruption or nuisance on or adjoining the project.
- d) that as good environmental practice all places of work, including sites, will be kept clean and tidy.
- e) avoid pollution of the air, ground and water by unnecessary noise, fumes, dust or the disposal of construction materials.
- f) establish targets against which environmental performance can be measured.
- g) regularly assess the need for further environmental investigations or surveys.
- h) comply with the appropriate Codes of Practice.

With regard to the Company's equipment, to ensure pollution is minimized, all equipment will be regularly assessed to ensure that it both runs efficiently and that the optimum noise reduction methods are implemented.

Monitoring of these requirements will be undertaken by the Operations Directors and shall be carried out at regular intervals to ensure the environmental controls are effective.

Where environmental problems are encountered during the works it will be brought to the attention of the Project Manager or Head of Department who shall review the problem and, where applicable, propose an acceptable solution.

It will be the responsibility of the Project Manager or Head of Department to ensure that the Company's Environmental responsibility is communicated to all staff and that each individual is encouraged to input into the environmental system such that all can contribute to minimizing the impact on the environment.

Mr. Khushroo Kali Wadia
Managing Director
